Education

ITM GOI Gwalior

B.Tech Computer Science and Engineering; CGPA 7.9

Aug. 2019 – June 2023

Gwalior, M.P

Projects

SaveKaro

- Want to save money from the shops like a salon, grocery, electronics, furniture, etc.? This application provides discounts on the products of offline shops. It also has a rating system so that you will get better shop suggestions and shopkeepers can also increase their customers by using the savekaro shopkeeper application. It is also good for shopkeepers to give genuine products so that they can increase the number of customers. This project includes two applications (for the user and for the shopkeeper). The user app includes an authentication and authorization feature, a booking system, a sort functionality according to current coordinates, a stripe payment system, and an email-based verification by node mailer. The shopkeeper app includes an authentication and authorization feature, an offer upload feature, analytics feature that includes the number of customers coming per day, earnings per day, etc.
- Tech Stack:** React Native, Redux-Toolkit, Tailwind CSS, Node.js, Express.js, MongoDB, Stripe, Nodemailer, Typescript, MVC architecture, etc.

Organic Store

- Designed and developed a fully dynamic web application where each section can be dynamically updated.
- Includes all the e-commerce features like Wishlist, cart, payment history, order, etc.
- Tech Stack:** Typescript, MVC architecture, MongoDB, Express.js, Node.js, Nodemailer, Stripe, gzip compression, Cloudinary,

Real time Chat Application

- Developed a fully functional **real-time chat application** using **Node.js, socket.io, and Mustache**.
- Implemented the concept of room-based segregation of users with a unique display name and room name.
- It has an **option for sending location** through chat messages, location is made by concatenating coordinates in the URL of google maps. Also Profanity is not allowed, those words are blocked and are not sent.

Experience

Doof Research Pvt Limited (Intern)

Jul 2021 – Feb 2022

Full Stack Web Developer

Remote

- Worked on **Authorization, and file upload on AWS S3 using multi-part pre-signed URL and mail service** in the backend and integrated it with the front.
- Implemented file upload feature using a multi-part approach and pre-signed URL and Developed the chrome extension for video and screen recording.
- Worked on new features and Developed UI of **pages and integrated API in the front end**.
- Tech Stack:** MERN Stack - React.js, Node.js, Express.js, MongoDB

[LOR Link](#)

Codeaxes Solutions (Freelance)

Mar 2022 – Jun 2022

Frontend Development

Remote

- Developed an app (**Brainycom**) to manage, and automate (association too) the organization with this community engine.
- Tech Stack:** JavaScript, React Native, Redux toolkit, React, Material UI

[Certificate](#)

Mendisure Incinerators (Freelance)

Mar 2021 – Apr 2021

Mendisure Incinerators

Remote

- Developed the backend of the plastic waste management website using **NodeJS, ExpressJS, Mongo DB, and Nodemailer**.
- Worked on authentication, authorization, emails, APIs, etc.

[Certificate](#)

Technical Skills

Languages and Core: C, C++, Javascript, DSA, OOPS, DBMS

Frontend: HTML5, CSS3, SASS, Javascript, Typescript, React.js, Redux, Next.js, Material UI, tailwind CSS, React Native,

Backend: Node.js, Express.js, MongoDB, Socket.io, AWS S3, Redis,

Other tools and skills: Git/Github, Docker, Strapi CMS,

Achievements

- FEA (Freedom English Academy) Certified.
- Awarded the Best intern award in Doof research private limited.
- Frontend fundamentals – purple and Workshop on IOT in IIT Indore.
